## Answer Key

During the day the sun shines brightly. The sun makes the days light instead of dark. Sometimes the sun makes it feel hot outside. In the summer the days are long. In the fall and winter the days get shorter and shorter.

When each day is done the sky grows dark. The moon and the stars come out. Sometimes the moon is full and large. Other times it is small. Sometimes it seems like it is not even there. If it is very dark outside and there are no clouds in the sky you can count the stars. If you add them all together there are probably more than eight hundred stars in the sky!
